## SILICATE PAINTS

### DESCRIPTION:

- Particularly useful in straw bale homes and renovations in conventional homes.
- Silicate paints are made of 97% mineral ingredients.
- Water resistant
- Washable
- Durable
- Allows the coated surface to breathe while remaining water repellent.
- Free of volatile organic compounds (VOC)
- Odourless within hours
- Acts as a fire retardant
- Mildew resistant
- Naturally fungicide free.
- Unlike typical paints, which merely form a coating and can peel and wear over time, silicate paints actually absorb into and permanently become part of the mineral surface to which they were applied. Importantly for straw bale builders, silicate paints can be applied and reapplied perpetually without negatively affecting the wall's ability to breathe.
- Unlike other natural paints, these silicate paint solid tone colours are deep, rich and vibrant and include:
  - > Earth Black
  - > Ultramarine Blue
  - > Persian Red
  - > English Red
  - > Red Ochre
  - > Yellow Ochre
  - > Oxide Green
  - > Raw Umber
  - > Burnt Umber

**See page 2 for Color Chart**

### PRICE:

	Base White Primer	Interior	Exterior	Solid Colour Tinted Pastes
.25 litre	\$10	NA	NA	NA
1 litre	\$30	NA	\$22	\$30
3.78 litre	\$89	\$40	\$69	\$89

## ADDITIONAL INFO:

- Perfect for earthen, cement-lime and lime plasters as well as new drywall, gypsum plaster and above grade concrete, stone and brick.
- Ideal for wet areas, high traffic, both indoors and out.
- Cannot be applied over an existing coat of oil or latex paints unless they are well sanded to expose the mineral surfaces listed above.
- Not suitable over wood, plastic, metal or other non-mineral surfaces.
- Colour washes, faux finishes, glazings and other artistic options are possible. Interior and exterior versions available with 8 earthen and mineral tint colours and flat white available either premixed or tintable by the user.
- Silicate Primer should be applied first to bind and solidify any loose surface materials (such as crumbling mortar, powdery lime paints, grainy plaster). Silicate Primer will also help absorb into the surface to limit the amount of paint required and prevent tannin stains.
- Coverage depends on substrate but can exceed latex paints by 25% on less permeable surfaces.
- Contact us for approximate coverage based on your needs. Available in flat white (ideal for drywall ceilings) which can be mixed by the user with any combination of 8 solid tone colour paint pastes to provide an off-white or pastel colour finish.
- Solid tone colour paint pastes may be applied without mixing directly to the surface for a deep colour finish.
- For large orders, we can blend colours to your provided paint chip for an additional mixing charge.

## NATURAL OIL FINISHES FOR WOOD

### DESCRIPTION:

We carry a variety of high performance, Canadian-made, naturally-blended oil products provide a long lasting and grain enhancing finish for a range of applications.

#### **Light Linseed Primer Oil**

For interior applications on porous or old wood and stone. Use as a first coat to reduce quantity of final treatments of either Liquid Beeswax Wood Finish, Hardwood Oil Finish or Tree Resin and Oil Finish. 90-150 sq ft of coverage/litre.

#### **Tree Resin & Oil Finish**

Hardens interior softwood surfaces, enhances wood grain with a matte sheen and makes wood surfaces resistant to water and dirt penetration. Clear to honey-toned or may be user tinted with a suitable stain paste. A final treatment of wax is recommended especially on floors. Not suitable for high traffic areas. 90-150 sq ft of coverage/litre.

## NATURAL TINTS AND PIGMENTS

### DESCRIPTION:

These powdered mineral and earthen tints are available in the same colours as our Solid Colour Silicate Paints and are ideal for blending with our Silicate Paint Primer to make colour washes, faux finishes and applications similar to aquarelle painting.

The tints can also be added to our Exterior Stucco finish for straw bale walls.

### PRICE:

\$17.50 / 180 grams; \$35.50 / 454 grams

### ORDER & DELIVERY:

**Delivery Time:** 1-2 weeks on stock items, 2-4 weeks on non-stocked items
