CARNUBA FLOOR WAX

DESCRIPTION:

Carnauba Floor Wax is a fine protective surface finish for interior wood, natural stone, terra cotta and unglazed tiles. Apply thin coats preferably on smooth surfaces and parallel with the wood grain. Avoid wax build-ups in cavities and cracks. Ideal for furniture and average-use floors. Water-resistant, but do not use on frequently wet areas.

ADDITIONAL INFO:

Use as a final "wear & tear" coat indoors on low- and medium-use wood surfaces, such as floors & furniture. Softwood surfaces should be pretreated with # 263 Tree Resin & Oil Wood Finish. For low-use decorative wood and furniture just a primer coat with # 261 Light Linseed Primer Oil may be sufficient.

Note: For standard maintenance, use a mild soap and water. To rebuild the wax coat use # 315 Liquid Beeswax Wood Finish.

Ingredients : beeswax, carnauba wax, refined linseed oil, damar varnish, rosemary oil, # 115 Xtra Mild Citrus Thinner

Technical Properties: Protective finishing wax provides a satin, breathable and elastic protection coat. Reduces electro-static loading of surfaces. Does not blister or peel. Wear and tear areas can be easily refinished or patched by applying additional coats. Wax build-ups and spots can be removed with # 115 Xtra Mild Citrus Thinner.

ECO-HOUSE LIQUID BEESWAX WOOD FINISH

DESCRIPTION:

Eco-House Liquid Beeswax Wood Finish yields a very fine, anti-static finish on interior wood, cork, natural stone and linoleum surfaces. Its use is only practical on smooth finished surfaces. Ideal on fine furniture and architectural woodwork, which is not exposed to moisture.

Ingredients : beeswax, shellac wax, carnauba wax, clay, # 115 Xtra Mild Citrus Thinner

ADDITIONAL INFO:

Use indoors only on most types of low-use wooden surfaces, as well as for maintenance of waxed floors. For additional protection, the surface can be pretreated with # 261 Light Linseed Primer Oil or # 263 Tree Resin & Oil Wood Finish.

Note: *For initial treatment of floors we recommend using # 300 Carnauba Floor Wax.*

Technical Properties: Maintenance and finishing wax with a moderate cleaning effect. Provides a silky, breathable and elastic protection coat. Reduces static loading of surfaces. Does not blister or peel. Easy to refinish by applying additional coats. Wax build-ups and spots can easily be removed with # 115 Xtra Mild Citrus Thinner.
